

What is SAS?

SOFGEN's Archiving Solution is a native TEMENOS GLOBUS™/T24™ File Utility which allows for on-line/real-time retrieval of archived data. Without sacrificing data access, it allows TEMENOS GLOBUS™/T24™ users to save disk space.

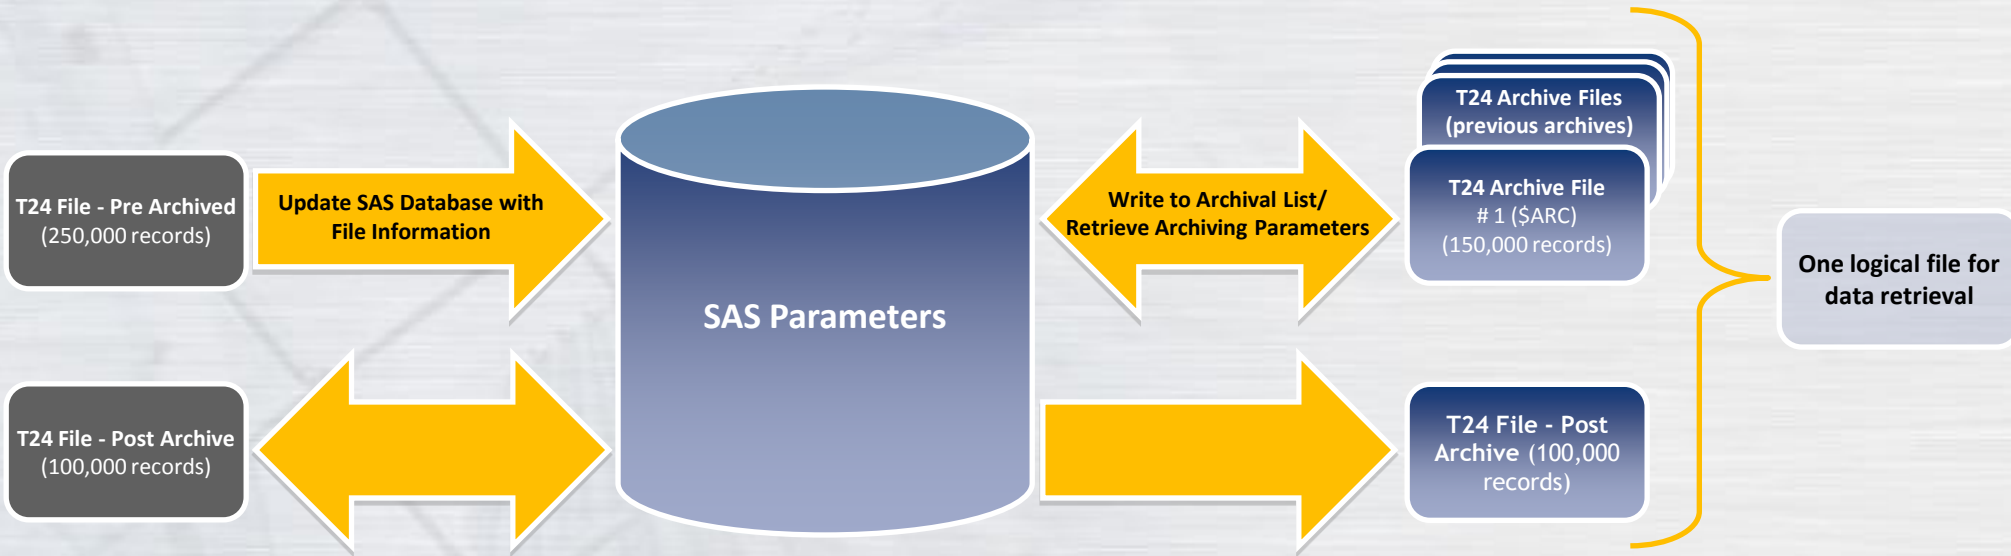

Key Business Benefits:

- ✧ Improve system performance
- ✧ Minimize risk
- ✧ Control costs

Key Technical Features/Benefits:

- ✧ Parameter driven at file level (frequency, file size, retention period)
- ✧ Can be configured to run as a background process or as an online process
- ✧ Can be run during COB with a pre-specified archive frequency
- ✧ Includes delivery files archiving
- ✧ Handles most common candidate files in TEMENOS GLOBUS™/ T24™ including static data
- ✧ Built-in generic process to archive any independent files
- ✧ Ability to retrieve both live and archived data on-line/real time through summary enquiries
- ✧ Archived records can be restored if required
