

# What is SMM?

SOFGEN Migration Manager is an “intelligent” migration utility operating at the TEMENOS T24™ API/OFS level and is fully compliant with R8, R9 & R10, including the AA module. By enforcing the referential integrity of uploaded data across modules, it greatly reduces implementation risk, particularly at “Go Live”.

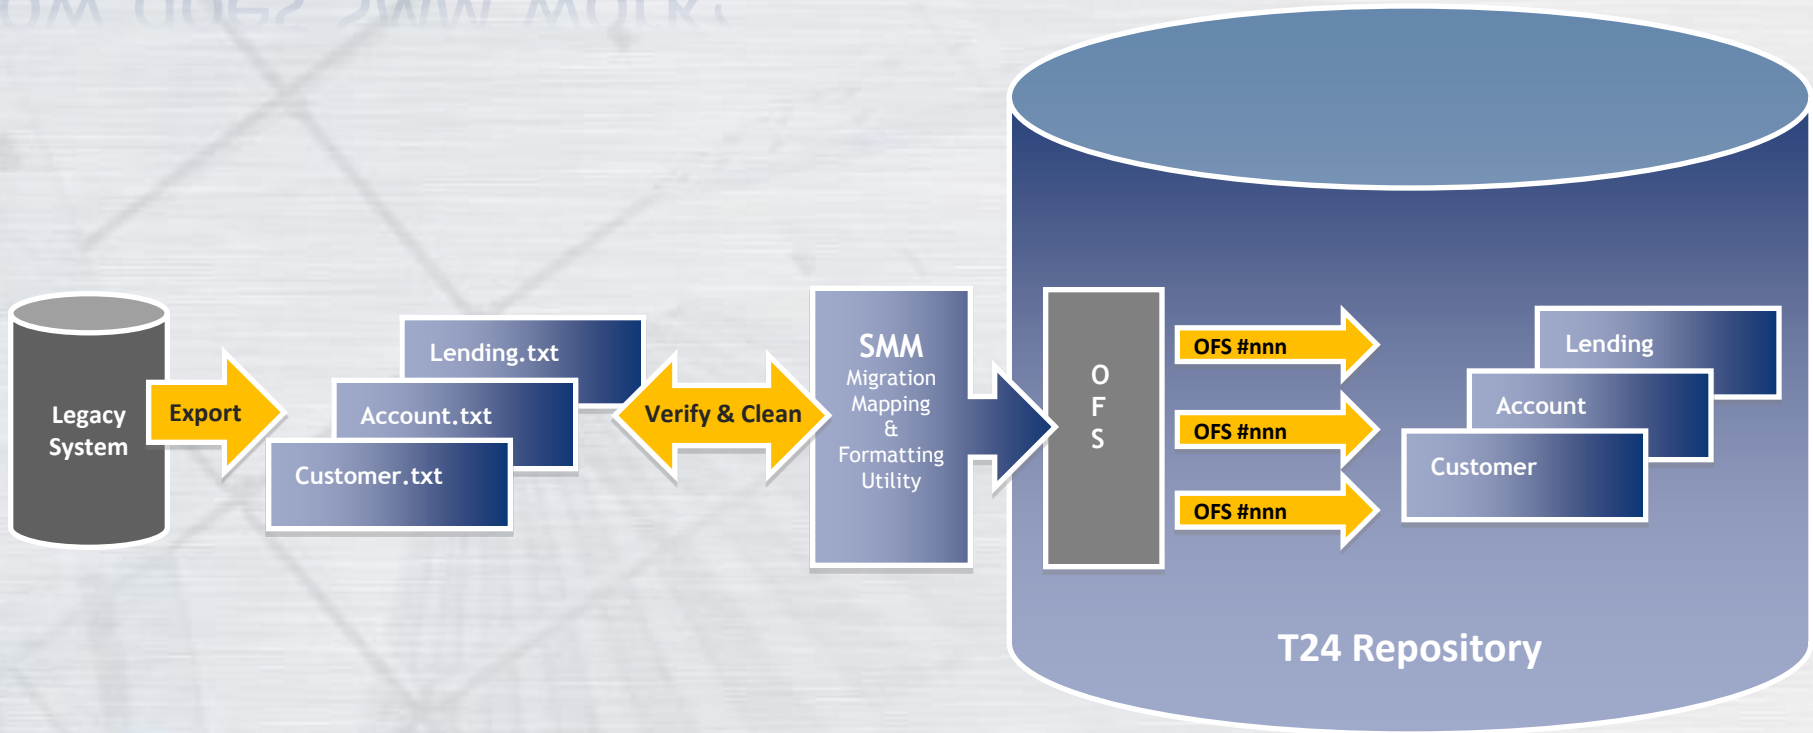

## Key Business Benefits:

- ✧ Reduced migration risk
- ✧ Reduced cost through automation
- ✧ Auditability
- ✧ Improvement of data integrity in legacy and target systems
- ✧ Elimination of human error
- ✧ Simplified and reduced administration

## Key Technical Features/Benefits:

- ✧ User friendly generic T24 migration utility, fully configurable to easily map any incoming flat file to a respective T24 application
- ✧ Fully compliant with T24 and Browser and its use of T24 multi-threaded OFS functionality
- ✧ Additional add-ons to create balanced Accounting take-on and entries
- ✧ Generic mapping to any flat-file, irrelevant of delimiter
- ✧ Fully configurable to all T24 Applications
- ✧ Field by field validation to respective T24 application
- ✧ API hook to manipulate field values, if required
- ✧ Generic formatting into OFS syntax
- ✧ Multi-threaded processing via OFS
- ✧ AA Compliant
- ✧ R8, R9, R10 & Browser Compliant

# How does SMM work?

## ACTIONS

- ✧ INSTALLATION
- ✧ CONFIGURE
- ✧ ITERATIVE MIGRATIONS
- ✧ UAT
- ✧ ACCEPTANCE
- ✧ LIVE MIGRATION

## REPORTS

- ✧ Detailed Installation Documentation
- ✧ Detailed Migration Output Reports for OFS

## HELPDESK

- ✧ Chennai Helpdesk
- ✧ Dedicated Email Support
- ✧ Contact Numbers with Escalation

# How do I make SMM work in my bank?

## STEP 1

### Proof Of Concept

4 days offsite  
3 days onsite

- ✦ Agreement of POC success factors/test cases
- ✦ Off-site test case and visit preparation
- ✦ On-site workshops consisting of the initial installation, parameterization and configuration of the repository, as well as training for bank staff involved in the POC (Conducted by a Senior Consultant)
- ✦ Periodic and pre-defined off-site progress reviews of POC progress, as per agreed milestones
- ✦ Final review of POC and discussion of results

## PURCHASE DECISION

## STEP 2

### Implementation and Training

5 days onsite

- ✦ Install, configure and test SMM in the “TEST” database
- ✦ Technical training - 3 Sessions
- ✦ SMM overview & architecture
- ✦ SMM operational training
- ✦ SMM API training
- ✦ Creation of Migration test cases
- ✦ Operation in “TEST”: Deployment of migration test cases in the “TEST” database
- ✦ SMM Migration results
- ✦ Deployment of SMM on “LIVE” database

## STEP 3

### Start-up Assistance

2 days onsite

- ✦ User Assistance - Operation in “LIVE” database
